

CALDERA TEXTURE

A woodgrain with prominent cathedrals and arches creates a dramatic profile. Richness is embodied through tight grains and waves of movement inspired by nature.

Our Textures

CLEETWOOD TEXTURE

A clean, linear woodgrain with subtle changes in the texture through depth and contrast.

Varying levels of gloss and movement draw the eye and attention to the finish.

SILT TEXTURE

Our silt finish, also referred to as stipple, is a low gloss finish great for any project. The subtle stippling creates a faint texture that hides fingerprints and slight wear due to the less reflective nature.

Our Inspiration

In the Cascades of Southern Oregon, a lake of perfect blue fills a void where a peak once stood. The brilliantly-blue deep water in a sleeping volcano is known by many as Crater Lake. The Crater Lake Collection is Panel Processing's new TFL collection hailing from our facility in Klamath Falls, Oregon.

We have worked closely alongside designers with the intent to create a collection that would resonate with a diverse design audience. The colors and textures embrace the strong natural elements that are inspired by Crater Lake and the surrounding area. From the sand on the shore, the deep, clear blue waters to the wave worn driftwood, the natural elements that have been captured in the design evoke a feeling of warmth and sentiment.

We have reconnected with nature,  
*exploring* the richness of  
the woods, sand and water.

BOARD SPECIFICATIONS

**Length:** 8'

**Width:** 4'

**Thicknesses:** 1/4" - 1-1/2"

**Minimums:** We will accommodate your order minimums, please contact your sales representative

**Substrates:** Collins Pine Particleboard, MDF, Plywood Cores, FSC® Certified (FSC-CO14474), NAUF, NAF (Carb Exempt) & Specialty Cores

**Panel Options:** 2 sided TFL or 1 sided with balancing backer

**Shipping Locations:** Klamath Falls, Oregon

**Finishing Options:**

- Sanded edges/ends for safe and easy handling
- Cut-to-size
- Edgebanding
- Custom components
- Full fabrication of panels available at multiple sites
- Special packaging

The mark of responsible forestry

At our Klamath Falls facility in Oregon, we operate a state of the art Wemhöner Thermal Fused Laminate Line. We also operate a components division where we offer premium quality cutting, edge banding and line boring. As a custom flat panel fabricator it is our job to take your vision and bring it to life; we can provide custom cuts, colors and quantities.
