

2020 COMPANY PROFILE

FGV Company

FGV COMPANY

History

Formenti & Giovenzana Spa

Formenti & Giovenzana is a Family run Company, established since 1947 in Veduggio (Brianza), 20km south of Como Lake.

In 1973 the new Headquarters was set up, and the Italian production unit footprint was extended from 3.000 to 27.000 sqm.

During the last 15 years, to meet the Global Challenge, Formenti & Giovenzana opened new affiliated companies in Brazil, Slovakia and China.

As a manufacturer, and through its delivering sites all over the world, Formenti & Giovenzana has become a “Pocket” Multinational Company; synonymous of high-quality service and constant attention to the customers.

In the last decade a broader philosophy was endorsed by turning the company from being a supplier to a partner ready to design, develop, industrialize and manufacture customized products in a cost-efficient way.
